History The first public version of AutoCAD was named CAD/PACS (1984). This was an application for the PLATO system. In 1986 the next major development was AutoCAD LT, a smaller, cheaper version of the previous AutoCAD. AutoCAD LT was originally released for the Apple Macintosh in 1986, and then ported to Windows in 1988. In 1990 CAD/PACS was renamed AutoCAD and was first released on Windows. It was available as a licensed application on all platforms for a per-seat fee, or as an App store application for an app-store-only fee. This was followed by AutoCAD 2000 in 1992, AutoCAD R14 in 1994, AutoCAD LT 2000 in 1998, AutoCAD 2007 in 2007 and AutoCAD 2009 in 2009. The 2007 release of AutoCAD was a major release of the software. From 1997 to 2001, there were 3 versions of AutoCAD in development, three for Macintosh, one for Windows, and one for Linux, which were all cancelled when Microsoft announced the Windows version of AutoCAD XP in 2001. On December 18, 2010, AutoCAD 2010 was released. It uses a new operating system design and features revised user interface with a more modern look and feel. The AutoCAD 2010 Premium and Standard editions of the software are sold separately, and are available for the Windows, Mac OS X, and Linux platforms. It can be installed as a stand-alone or an add-on application in AutoCAD R2014. AutoCAD 2010 Premium offers enhanced functionality over the standard edition, and includes the Content Management System, a digital library of AutoCAD content. It also includes many features that are now built into the other editions. From February 2011, AutoCAD R2014 will no longer be supported and will be discontinued. AutoCAD 2010 is currently the only version of AutoCAD that supports AutoCAD LT and vice versa. In March 2012, AutoCAD LT 2011 was released. On March 1, 2013, AutoCAD 2009 was discontinued in favor of AutoCAD 2012. The initial AutoCAD 2012 product was named AutoCAD 2012 Architect, a licensed edition of AutoCAD for architects and for creating architectural blueprints. Later, in 2014, AutoCAD 2012 Architect was renamed to AutoCAD 2012 Standard, and AutoCAD 2012 Architect was renamed to AutoCAD 2012 Enterprise. a1d647c40b
